SUMMARY

A M.S. in Business Analytics candidate (4.0 GPA) with 5+ years of experience translating data into business decisions. Skilled in SQL, Python, dbt, and data storytelling across analytics pipelines, predictive modeling, and dashboard development.

EDUCATION

Grand Canyon University, M.S. in Business Analytics, GPA: 4.0 / 4.0 Jan 2025 - Expected Jul 2026

Relevant Coursework: Predictive Analytics, Statistical Modeling, Machine Learning, Data Visualization

Member: Alpha Chi National College Honor Society

University of Vermont, B.S in Business Administration

Aug 2021 - May 2024

WORK EXPERIENCE

Inland Management

Williamstown, MA (Remote)

Customer Operations Analyst | Salesforce, Excel, LiveChat

Jan 2021 - Present

- Owned data quality across Salesforce CRM. Maintained 10,000+ lead records through verification, deduplication, and standardization routines, ensuring clean, reliable data for downstream reporting and sales routing.
- Analyzed operational trends using Salesforce reporting tools and translated findings into executive-ready narratives for senior leadership, enabling faster identification of performance gaps and process improvements.
- Monitored dashboards tracking lead volume, response time, and conversion rate, surfacing trends that supported process improvements across real estate transactions generating millions in annual revenue.

Spirit Electronics

Phoenix, AZ

Marketing / Sales Analyst Intern | Power BI, Excel, SQL, Python, Tableau, Airtable

Apr 2025 - Jun 2025

- Identified which marketing campaigns generated the highest lead conversion rates, building 3 Power BI and Excel dashboards to surface those insights for C-suite review, saving 5–8 hours of manual reporting per week.
- Designed an Airtable sales pipeline database with automated lead-capture forms to eliminate ~50 manual data entries per week, improving data accuracy across the sales team within one month of deployment.
- Surfaced high-engagement content patterns on LinkedIn using SQL and Excel, revealing what drove audience response and directly shaping the company's forward content strategy, resulting in a 15% increase in engagement.

PROJECTS

E-Commerce Review Prediction | Python, pandas, scikit-learn, CRISP-DM, Monte Carlo Simulation

2026

<https://github.com/huntersarkis/ecommerce-review-prediction>

- Applied the CRISP-DM framework to 95,000+ e-commerce orders to predict whether a customer would leave a negative review, enabling retailers to intervene proactively before dissatisfaction occurs.
- Engineered delivery-based features and ran statistical tests (t-test, chi-square) to surface that dissatisfied customers waited 6+ more days on average, selecting a Decision Tree classifier that achieved 82.6% accuracy.
- Ran a Monte Carlo simulation across 10,000 orders to model the impact of delivery improvements, finding that eliminating late deliveries drives more satisfaction than reducing average delivery time, with actionable recommendations for order fulfillment strategy.

Fintech Analytics Pipeline | Python, SQL, dbt Cloud, BigQuery, SQLite, Power BI, Git

2026

github.com/huntersarkis/fintech-analytics-pipeline

- Built a production-style analytics pipeline using Python, SQL, and dbt Cloud, transforming raw data through staging and mart layers into BigQuery fact and dimension tables, tested and documented via schema.yml.
- Engineered a customer risk model using SQL CASE logic to segment 500 users by credit score and overdraft behavior — identifying 21 high-risk accounts averaging a 612 credit score and 2.29 overdrafts, surfacing actionable findings for risk management.

SKILLS

Technical: Python, pandas, SQL, scikit-learn, dbt Cloud, BigQuery, GCP, Git, Power BI, Tableau, Excel, Salesforce, Airtable

Analytics: Data Storytelling, Predictive Modeling, ETL pipelines, Statistical Analysis, Sentiment Analysis, Dashboard Development

AI Tools: Claude, ChatGPT, GitHub Copilot

CERTIFICATIONS

Microsoft Certified: Azure Data Fundamentals (DP-900)

Mar 2026
